in the past four years i've been getting a lot more involved with my body and my work. i've been using it as a tool to understand and explore my femininity.

in my work i've been working on unearthing and unpacking the ways in which i've been socialized to view my body in a way that is not necessarily healthy for me. i've been exploring the ways in which i've been taught to see my body and how that has influenced my relationships with myself and others.

i've been using self-portraits to explore my own experiences and to understand how they have shaped my perspective on femininity. i've been using this work as a way to challenge the ways in which i've been socialized to view my body and to explore the ways in which my body has been used as a tool to understand and explore my femininity.

some of my work is focused on the ways in which i've been socialized to see my body in a way that is not necessarily healthy for me. i've been exploring the ways in which i've been taught to see my body and how that has influenced my relationships with myself and others.

i've been using self-portraits to explore my own experiences and to understand how they have shaped my perspective on femininity. i've been using this work as a way to challenge the ways in which i've been socialized to view my body and to explore the ways in which my body has been used as a tool to understand and explore my femininity.
